ELSEVIER

Comput. Methods Appl. Mech. Engrg. 120 (1995) 411–412

Computer methods in applied mechanics and engineering

Contents Volume 120

Volume 120, Nos. 1–2, January 1995

The Cosserat surface as a shell model, theory and finite-element formulation
C. Sansour and H. Bednarczyk 1

A new finite element formulation of shock-induced hull cavitation
G. Sandberg 33

The removal of overshoot in P.D.E. solutions by the use of special basis functions
J. Greenstadt 4

Dynamics of sliding geometrically-exact beams: large angle maneuver and parametric resonance
L. Vu-Quoc and S. Li 65

Load-balancing for parallel computation of fluid dynamics problems
Y.P. Chien, F. Carpenter, A. Ecer and H.U. Akay 119

A kinematically exact space finite strain beam model – finite element formulation by generalized virtual work principle
G. Jelenić and M. Saje 131

An implicit multidomain spectral collocation method for stiff highly non-linear fluid dynamics problems
I.M. Kuria and P.E. Raad 163

Numerical non-linear analysis of secondary buckling in stability problems
B. Wu 183

Volume 120, Nos. 3–4, February 1995

A mixed finite element for shell model with free edge boundary conditions. Part 1. The mixed variational formulation
P. Destuynder and M. Salaun 195

A mixed finite element for shell model with free edge boundary conditions. Part 2. The numerical scheme
P. Destuynder and M. Salaun 219

Entropic thermoelasticity at finite strains. Aspects of the formulation and numerical implementation
C. Miehe 243

A multilayer composite triangular element for steady-state conduction/convection/radiation heat transfer in complex shells
J. Argyris, L. Tenek and F. Öberg 271

A finite element method to model progressive fracturing
Z. Li and M. Reed 303

Finite element simulation of dynamic strain-localization: A multi-scale problem
B. Loret, J.H. Prevost and A. Deb 315

Formulation of Mindlin–Engesser model for stiffened plate vibration
K.W. Liew, Y. Xiang, S. Kitipornchai and J.L. Meek 339

Application of natural approach to non-linear analysis of sandwich and composite plates and shells
J. Zhu 355

Design of laminated composite plates for optimal dynamic characteristics using a constrained global optimization technique
T.Y. Kam and F.M. Lai 389
